

IT based learning environment + IT equipments

modern technological devices in classrooms:

- laptop+internet
- interactive whiteboard/clever board
- tablets/classmate PC-s
- digital materials of student books
- projector

laptop+internet+projector:

- PPT presentations can easily be brought to the classroom
- pictures, soundtrack can smoothly be shown to students
- authentic sources can simply be brought into the classroom
- webquests (more about them tomorrow)
- videos can be played – perfect for motivation

interactive board/clever board:

- the whole lesson or parts of the lesson can be made interactive
- digital material of student books are often designed for the clever board
- wordwall software is better used on the clever board
- motivates students, makes the learning process enjoyable and constructive

tablets/classmate PC-s:

- helpful and useful during testing, practising
- great motivation for students
- almost essential when doing webquests
- makes the learning process constructivist – students are rather independent, but monitored

On which part of the lesson should we use IT equipments?

How to avoid discipline problems?

What is wordwall, how do we use it?

- perfect for all subjects
- we make the exercises ourselves, but they can be saved and used again
- it makes the learning process constructivist, especially if we ask students to try to make their own exercises for each other
